March 2018 – Present | International

Member of LGBTQ+ nonprofit
organization

Iowa-raised, New York-based. I am a front end engineer who fuses engineering with my design background to create aesthetically rich and intuitive web apps.

Experience

Front End Engineer, Kinetx Co

May 2020 – Present | New York, NY

- Lead new feature design for Kino platform and created alignment amongst to execute vision.
- Collaborated on interactive product walkthrough, educating users on core features of Kino.
- Identified and reported over 100 bugs, errors, interoperability flaws, improving initial product launch.

Patternmaker, Ferrara Manufacturing

April 2019 – Sept 2019 | New York, NY

- Engineered and aligned automated patterns to client measurements, reducing specification errors by 20%.
- Enabled automatic cutting of plaid styles using Gerber, increasing productivity by 15% on matching styles.

Projects

Pintoit ([Live Site](#), [GitHub](#))

April 2020 – May 2020 | New York, NY

- Produced a full stack Pinterest clone that allows users to share and organize pins to categorized boards.

Felix ([Live Site](#), [GitHub](#))

April 2020 – May 2020 | New York, NY

- Headed front end design and development for app that provides curated content in sync with the user's mood.

Algo Visualizer ([Live Site](#), [GitHub](#))

April 2020 – May 2020 | New York, NY

- Constructed a visualization tool that grants users access to see how sorting algorithms operate.
